**cohesive energy**

$$E_{\text{coh}} = E_{\text{solid}} - E_{\text{atom}}$$

Is solid fcc Al energetically stable ?  
Is solid bcc Fe energetically stable ?

---

---

---

---

---

---

---

---

**formation energy**

$$E_{\text{form}} = E_{\text{alloy}} - (E_{\text{solid-1}} + E_{\text{solid-2}})$$

Is solid CsCl-FeAl energetically stable ?

---

---

---

---

---

---

---

---

**formation energy**

$$E_{\text{form}} = E_{\text{alloy}} - (E_{\text{solid-1}} + E_{\text{solid-2}})$$

$$= E_{\text{CsCl-FeAl}} - (E_{\text{fcc-Al}} + E_{\text{bcc-Fe}})$$

Is solid CsCl-FeAl energetically stable ?
